

Nikhil Gurav

QA Automation Engineer

📞 +91-8888322083 ✉️ nikhilguravnkil@gmail.com 📍 Pune, Maharashtra, INDIA 📅 4 Years of experience

QA Automation Engineer with 4+ years of experience in UI automation using Selenium WebDriver (Java). Skilled in test framework development, CI/CD pipeline integration with Jenkins and Docker, and cross-browser testing via Selenium Grid. Experienced in Agile/Scrum delivery across enterprise SaaS products.

KEY SKILLS

✓ Automation Testing ✓ Manual Testing ✓ MDM Testing ✓ Jenkins ✓ GIT ✓ Fogbugz ✓ JIRA ✓ Testrail
✓ Test Case Design ✓ POM ✓ Functional Testing ✓ Regression Testing ✓ Sanity Testing ✓ Integration Testing
✓ BDD Cucumber ✓ Selenium Webdriver ✓ Java ✓ Maven ✓ Selenium Grid ✓ Docker ✓ UI Automation ✓ SQL
✓ VMware ✓ Agile Methodology

WORK EXPERIENCE

QA Automation Engineer

Aug 2022 - Present

Aloha Technology

- Developed and maintained 200+ automated UI test scripts using Selenium WebDriver (Java) + POM — increased test coverage by 60%
- Reduced manual regression testing effort by 40% through structured Cucumber BDD framework with scenario-driven automated test cases.
- Configured parallel test execution across Selenium Grid nodes — cut overall test suite runtime by 30%
- Integrated test suites into Jenkins CI/CD pipeline with Docker — reduced defect escape rate to production by 35%
- Executed cross-browser tests across Chrome, Firefox, Edge, and Safari using Selenium Grid
- Generated detailed HTML reports via Extent Report with pass/fail metrics and failure screenshots after every sprint
- Logged and managed 200+ defects in FogBugz — zero missed SLAs on critical/high severity issues
- Performed SQL database validation to verify data integrity across backend processes
- Maintained clean version control using GIT/GitHub with structured branching workflows
- Participated in sprint planning, standups, and retrospectives within Agile/Scrum teams

PROJECTS

Faronics Insight

21 Months

- Performed end-to-end manual testing of endpoint monitoring, remote policy deployment, and system reporting
- Designed and executed 120+ manual test cases in TestRail covering all major console workflows
- Logged 70+ defects in FogBugz with severity, priority, and business impact classification
- Created and executed detailed test plans by analyzing functional requirements and specifications.
- Collaborated closely with developers to raise, document, track, and validate defects, ensuring timely resolutions.
- Performed smoke testing after each deployment to ensure environment and build stability.
- Actively participated in Agile ceremonies including sprint planning, backlog grooming, and daily stand-ups.

Faronics Deploy

21 Months

- Automated UI test cases for system restoration and configuration management using Selenium WebDriver (Java)
- Built regression and smoke suites using TestNG grouping — enabled fast targeted execution during hotfix releases
- Configured Jenkins CI/CD jobs with Dockerized environments; maintained 95%+ nightly pass rate
- Logged and tracked 40+ defects in FogBugz; validated all fixes before release sign-off
- Involved in the complete Software Testing Life Cycle STLC including requirement analysis, test planning, test execution, and defect reporting
- Maintained and optimized automation scripts by updating locators, refactoring code, and reducing flakiness to improve test reliability.

EDUCATION

MS/M.Sc(Science) IT Shivaji University, Kolhapur	2024
B.Sc IT Shivaji University, Kolhapur	2020

KEY ACHIEVEMENTS

• Maintained 200+ automated UI test scripts across 4 SaaS products — reduced regression cycle from 3 days to under 8 hours • Achieved zero missed SLAs on 200+ critical and high severity defects across all products and sprints • Reduced test suite execution time by 30% via parallel execution using TestNG + Maven across Selenium Grid • Maintained 95%+ nightly pass rate through Jenkins CI/CD and Docker-integrated automated test pipelines • Reduced defect escape rate to production by 35% through continuous automated test integration in Jenkins
